CookTek INDUCTION COOKING, HOLDING AND DELIVERY

EFFICIENT **HEAVY DUTY RAPID BOIL** PRECISE **TEMPERATURE CONTROLLED**

Created in 1994, CookTek[®] is the leading innovator in induction warming, cooking, and heated delivery systems for commercial kitchens and restaurants. The CookTek[®] mission is to change the way the world cooks, serves, and delivers food.

The Induction Revolution

Whether the slightest touch of heat to melt the most delicate product or explosive force to instantly blacken or boil, CookTek[®] induction systems provide the means.

CookTek[®] innovative induction systems bring food service to a whole new level with advanced, efficient cooktops, food warmers, and more. Professional chefs in commercial kitchens enjoy higher productivity, substantial energy savings, and safer cooking.

Benefits of Induction

CookTek[®] induction systems are faster and more efficient than both gas and electric. They are easy to control for precise heating and unmatched results. The induction cooktop surface remains cool to the touch for lower risk of injury and easier cleanup. CookTek[®] induction systems offer significant energy savings, lower utility bills, and provide a cooler, greener kitchen.

How Induction Works

Induction heating devices work by applying an alternating electromagnetic wave to magnetic cookware, such as stainless steel or cast iron pans. The metal molecules are attracted in different directions as the current alternates. Heat is generated from resistance and other physical processes caused – or induced – by the wave.

CookTek[®] induction systems are 94% efficient, meaning that 94% of the energy consumed is delivered to the pan. This is unmatched by gas (typically 35%) or traditional electrically-powered cooking devices (typically 50%). As a result, induction cooking devices release less heat into the room, use less fuel, and save energy.

% of Energy Delivered to Pan

Induction		94%
Electric	50%	
Gas	35%	

CookTek Warranty - U.S. and Canada

All CookTek[®] induction cooking and holding equipment is warranted against defects in materials and workmanship. "Portable" CookTek[®] products, including the single and double cooktops, wok, FaHeater, SinAqua Souper, ThermaCube Delivery System, and Pizza Delivery System, are covered by a two-year advanced replacement warranty. "Non-portable" CookTek[®] products, including the Silenzio, SinAqua, Incogneeto, Stock Pot, four and six-burner ranges, and plancha are covered by a one-year field-service warranty. Non-electrical consumables and accessories are covered for a period of 90 days.

INDUCTION COOKING

Professional chefs worldwide count on CookTek[®] commercial induction cooktops to deliver the precision and consistency they need for quality results. CookTek[®] portable countertop cooktops heat food evenly, quickly, and efficiently, with easy-to-clean surfaces and energy efficient technology. Finally, you can enjoy a cleaner, safer, cooler, and more efficient kitchen with lower utility bills!

(Drop-in or Countertop)

INDUCTION **WARMING &** HOLDING

Food must <u>be prepared well, but</u> also served properly! CookTek[®] induction warming and holding equipment keeps food at the right temperature while improving your presentation and overall quality. Because of its innovative design and advanced heating technology, CookTek® induction warming and holding equipment delivers the best results every time!

INDUCTION DELIVERY

Food delivered fresh and hot helps keep your customers loyal. CookTek[®] heated delivery systems use induction technology to retain flavor and warmth - just like serving food straight from the oven! Discover the convenience, innovation, and customer satisfaction of CookTek® induction delivery systems.

ThermaCube[™] Food Delivery System

Pizza Delivery System

INDUCTION EFFICIENT COOKWARE

No other tri-ply pan on the market can capture the amount of energy produced by induction and deliver that energy to your culinary creations like CookTek[®] tri-ply cookware...period.

Single-hob **Induction Cooktop**

Portable, Modular Heat

Nearly 2x more powerful than an electric burner, same plug Precise heating control for exceptional results No flames or hot surfaces provide for safe portable cooking Available in single or double, countertop or drop-in Temperature range from 85°F–500°F (30°C–260°C) 22 temperature settings and 20 power settings Even heat distribution across the bottom of cookware Automatic pan detection allows for instant energy transmission to pan Automatic shut-off feature prohibits overheating

ThermaCube

Heated Delivery for up to 30 Minutes

Induction-charged natural convection tray circulates hot air around the food for up to 30 minutes

VaporVent[™] lid eliminates condensation

Fast heat-up - initial charge takes less than 3.5 minutes;

recharges in as little as 90 seconds

Natural convection tray available in nominal, +10%, and +25% heat

Cordless bags for convenient, efficient delivery

Easy to clean - delivery bag (without Natural Convection Tray) is

machine washable; Natural Convection Tray is submersible for cleaning (not dishwasher safe)

ThermaCube Delivery System includes a charger, +10%

Natural Convection Tray, and small delivery bag. Replacement components sold separately.

TRI-PLY COOKWARE

CookTek[®] offers the most efficient and powerful cookware in the industry to match up with the most efficient and powerful induction cookers in the industry. Our pan efficiency comes from a perfectly-balanced selection of the following:

- Premium 18/10 (304 stainless) steel interior reduces food adhesion and staining and protects your culinary creations
- Generous amounts of 1050 aluminum alloy for unrivaled heat balance and transfer
- A robust foundation of 18/0 (430 stainless) steel captures virtually 100% of the Eddy current for maximum efficiency and performance

No other tri-ply pan on the market can capture the amount of energy produced by induction and deliver that energy to your culinary creations like CookTek[®] tri-ply cookware...period. Your search for the best-performing tri-ply cookware with

8" Fry Pan Part # 105209
